Active investments in Emerging Markets

Lasting active investments
The C WorldWide Emerging Markets fund offers a diversified portfolio of high-quality, growth-oriented companies that we consider the best equity investments in Emerging Markets.

Our goal is to combine long-term trends and shorter-term themes with thorough stock-picking in order to generate an attractive, long-term return for the patient investor. An investment in The C WorldWide Emerging Markets fund is an investment in companies that are exposed to trends and themes, offering higher growth rates than the markets in general.

We rely on our proven fund of selective stock picking combined with thematic tailwind and a long-term investment horizon. The investment mandate gives our experienced team of portfolio managers the opportunity to select the equities we believe will become superior long-term investments.

- High growth potential
- Active investments in Emerging Markets

Taking into account the particular market structure of Emerging Markets, the portfolio consists of a combination of large as well as medium and small cap stocks in order to gain exposure to the growing importance of the smaller market segment as part of the long-term growth case for Emerging Markets.

Long-term growth
The C WorldWide Emerging Markets fund aims to achieve long-term capital growth exceeding the return of the market combined with a moderate risk profile in line with market levels of volatility.
