Active investments in nordic equities

Lasting active investments

The C WorldWide Nordic fund offers a diversified portfolio of high-quality companies that we consider to be the best equity investments in the Nordic countries.

Our goal is to identify the lasting investment — the long-term opportunity — based on an in-depth analysis of free cash flow, as we see this as the main long-term driver of share prices. An investment in the C WorldWide Nordic fund is an investment in companies based in a richly diversified and low-risk region with high political stability that has a global exposure to their products or services. Furthermore, companies based in countries in the Nordic region have high ethical standards.

Consistent investment method

We rely on our proven methodology of selective stock picking combined with thematic tailwinds and a long-term investment horizon. Our experienced team of portfolio managers select equities that we believe will become good long-term investments, without any benchmark constraints. Using these selection criteria, we continue to navigate the Nordic equity markets with the same passion and commitment for achieving strong returns that we have held since 1986:

- Focused portfolio
- Sustainable business models
- Active Nordic investments

Long-term growth

The investment objective of the C WorldWide Nordic fund is to achieve long-term capital growth exceeding the return of the market with a moderate risk profile in line with or below the risk of the market. Our experience in managing focused portfolios is that a concentrated portfolio of 25 to 30 high-conviction stock picks ensures sufficient risk diversification.
